

Instructions:

Black paper: cut outline only.

Pink paper: cut butterflies, dots & outline.

Green paper: cut flowers, butterflies, dots and outline.

White paper: cut all.

If you decide to switch out the colors, always remember that the color that you want it to be...it the color that you will never cut when you get to that layer.

Ex: The leaves were green....but the leaves aren't cut from the green paper. Plan your strategy carefully before your cut.
